The Union Pacific Railroad officials at Omaha Monday settled with the striking blacksmiths on the same terms given to machinists and boller-makers.

The textile strike in Philadelphia continued in spite of the concessions made by a few employers, whose mills were unable to operate for want of raw maierial. The committee of the workers made an unfavorable impression by its declaration of "nothing to arbitrate."

Whole Field at a Glance.

This busy world of ours, struggling up from primitive savagery into the higher ideal of twentieth century civilization, has heard with a certain new sense of shame Thursday's tale of plotted butchery and brutality at Belgrade-grim reminder of the political revolutions once common to all. For, however "poetic" the bloody justice meted to Alexander, last of the Obrenovitch dynasty, to his pretentious spouse, Draga, and their supporters, in view of the wretched abuses of power, the inhumanity and ferocity of the method lay bare the latent weakness and crudity of the Servian people, burdened with a standing army of 100,000, or equal to all

Servian people, burdened with a standing army of 100,000, or equal to all the children in the schools. Whatever the virtue of King Peter, the newly proclaimed scion of the Karageorgevitch dynasty, the manner of his coming may be expected to set some of his people thinking.

Far greater than this thagic turn of events in the Balkans, in real significance was the postponement of the tariff crisis in England by Mr. Balfour's dexterous appeal for an open mind toward Chamberlain's scheme, notwithstanding the opposition of other members of the Cabinet, Arab rebls yielded to France. Flight of General Matos followed collapse of Venezuela's revolution.

The postoffice scandal continues to be almost the sole topic of political importance in this country. President Roosevelt's return has served to stimulate the investigation of irregularities touching nearly every part of the service. Warships were sent to Valparaiso in view of dock troubles there. The business world has witnessed with satisfaction the action of New York city authorities in beginning judicial investigation of two walking delegates accused of taking bribes. At the same time the central organization of the building trade unions has suffered a secession of the more skilled trades, which were opposed to continuing the alliance with the teamster and truckmen. Thus the building tie-up was partially relieved. Philadelphia's great textile strike has lost considerable moral support by the "nothing to arbitrate" attitude of the strikers. A general building lockout was begun at Pittsburg because of disagreement of the unions of stone-masons and bricklayers. Some Chicago hotels gave in to striking employes. Federal troops called out in Arizona on account of miners' strike. BALFOUR AVERTS A CRISIS.

When the proposal of Mr. Ritchie, chancellor of the exchequer, to abolish the tax on grain came before the British House of Commons Tuesday the whole nation was on the qui vive in anticipation of a debate that was expected to settle the political status of Colonial Secretary Chamberlain's protective tariff programme. The discussion took shape around the amendment of Mr. Chaplin declaring the removal of the grain tax a needless and injurious disturbance of trade and a loss of revenue, without relief for the consumers. Beginning with Sir Michael Hicks-Beach, one after another of the Conservative leaders faily repudiated Mr. Chamberlain's policy, and that night, after a Cabinet meeting, it was believed generally that Chamberlain had been forced out of the Cabinator.

UNCOLN CITED TO ROOSEVELT.

The Rev. Thomas Dixon, Jr., of New York, addressing the American Booksellers' Association Monday on the negro question, criticised President Roosevelt for his speech at Lincoin's grave last week, in which he said: "Give the negro a fquare deal." Mr. Dixon referred the President to the speech of Lincoin, in which the belief was expressed that the physical difference between the white and black races "would forever forbid their living together on a plane of social equality." As a Southern man, Mr. Dixon reducted that the South would yet build a statue of Lincoin at the capital of the Confederacy. He thought there were but
